“Fizz Boom at Library Science Camp”

Learning doesn't just come from reading books at the Norfolk Public Library. Thirty-five kids have been learning about surface tension and the carbon dioxide cycle at the Norfolk Public Library science camp this week. In experiments with dry ice, foaming bottles of suds and gas filled bubbles, Jamie Bachmann, Outdoor Education Assistant with the Nebraska Game and Parks Commission teaches kids how science experiments relate to the natural world. It's all part of the Fizz Boom and Read reading program at the library this summer.
